**DETAILED ACTION**

***Response to Amendment***

The examiner is in receipt of applicant's response to office action mailed 4/6/2006, which was received 5/11/2006. Acknowledgement is made to the amendment of claims 31,42 and 50, leaving claims 31-50 as pending in the instant application. Applicant's remarks and amendments have been carefully considered and were found to be persuasive, however, after further searching a new grounds of rejection is provided below:

***Priority***

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

The later-filed application must be an application for a patent for an invention, which is also disclosed, in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No.'s 09/645,086, 09/567,716, 09/564,386, 09/465,729, fail to provide adequate support or enablement in

the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. In this case at least “order/assigning security clearance security clearance for a particular venue from a plurality of venues” is only found in the instant application therefore the priority given to the instant application is that of October 12, 2001, which is the filing date of the instant invention.

***Interview***

The examiner contacted G. Plichta to discuss the location of support for the newly added feature “from a plurality of venues” Mr. Plichta pointed out paragraph 0144 of US PG PUB 20020095357 as support indicating that the clearance could be for a plurality of venues instead of one venue as is taught by the prior art Diamond.

**Examiner’s Note**

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

***Claim Rejections - 35 USC § 102***

Art Unit: 3625

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 31,33-42,44-50 are rejected under 35 U.S.C. 102(e) as being anticipated by Cockerham (US 2003/01288099).

In regards to claims 31,33-42,44-50, Cockerham discloses all the features of the instant claims, For instance, Cockerham teaches registering for permission to enter a plurality of venues from a remote point out side the venue (para 0033), this registration information being made available at check-points (FIG 4) of a plurality of venues (FIG 5).

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 32 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cockerham in view of Block (US 2002/0010604).

In regards to claims 32 and 43, Cockerham teaches registering for permission to enter a plurality of venues from a remote point out side the venue (para 0033) this registration information being made available check-points (FIG 4) at a plurality of venues (FIG 5), but does not specifically mention that the interface is a telephone system. Block teaches utilizing a cell phone to pre-clear a security clearance (para

0705). It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Cockerham utilizing a cell phone to pre-clear a security clearance, because this would preclude the user from standing in potentially long lines to register.

***Response to Arguments***

Applicant's arguments with respect to claims 31-50 have been considered but are moot in view of the new ground(s) of rejection.
